

#### COMPUTER VISION ENGINEER . GRADUATE STUDENT RESEARCHEE

3700 O'Hara Street, Pittsburgh PA, 15213

□724-841-8769 | ■ loevliedenny@gmail.com | ♠ www.loevlieDL.com | 回 loevlie | ☐ DennisLoevlie

"If you invent a breakthrough in artificial intelligence, so machines can learn, that is worth 10 Microsofts." - Bill Gates at CMU

# **Education**

#### **Carnegie Mellon University**

Pittsburgh, PA

M.S. IN CHEMICAL ENGINEERING, GPA: 3.91

Sep. 2019 - Dec. 2020

· Competed in several hackathons including the Covestro Hackathon, Hack the Northeast, and the Pitt Challenge.

#### **West Virginia University**

Morgantown, WV

B.S. IN CHEMICAL ENGINEERING, CUM LAUDE

Sep. 2016 - Aug. 2019

• Graduated with Presidential Honors from the WVU Honors college.

# Skills\_\_\_\_

**Machine Learning** Computer Vision, Natural Language Processing, Deep Learning

**Data Science** Feature Engineering, Data Visualization, Database Design

Software Git/GitHub, PyTorch, Tensorflow, OpenCV, SpaCy, Sklearn, Beautifulsoup, Selenium, Numpy, Matplotlib, Pandas

**Programming Languages** Python, MATLAB, JavaScript, HTML, CSS, SQL, LaTeX

**Soft Skills** Leadership, Problem Solving, Communication, Academic Writing

# **Publications**

## Demystifying the Chemical Ordering of Multimetallic Nanoparticles $[\mathscr{E}]$

Sep. 2022

ACCOUNTS OF CHEMICAL RESEARCH (SUBMITTED)

• Developed a novel method for calculating the cohesive energy of a bimetallic nanoparticle that overcomes major weaknesses in previous models. Generalized this method to be applicable to any number of metals (multimetallic nanoparticles). Submitted to Accounts of Chemical Research (Impact Factor: 22.38), GitHub - link

### Size-dependent shape distributions of platinum nanoparticles [ $\mathscr O$ ]

Aug. 2022

NANOSCALE ADVANCES

· Used Boltzmann statistics to support experimental findings on nanoparticle shape and size distributions.

### Resolving Electrocatalytic Imprecision in Atomically Precise Metal Nanoclusters $[\mathscr{O}]$

Nov. 2021

CURRENT OPINIONS IN CHEMICAL ENGINEERING

- Electrocatalysis applications of ligand-protected nanoclusters.
- Prospective section on current and possible future applications of machine learning in the field.

# Research Experience

### Computer-Aided Nano and Energy Lab (CANELa)

University of Pittsburgh

GRADUATE STUDENT RESEARCHER

June 2021 - PRESENT

- Developed a novel method for calculating cohesive energies of metal nanoparticles that led to a 71% improvement to the previous model.
- Applied quantum/statistical mechanics through Density Functional Theory, Boltzmann statistics, and mixed integer optimization using the genetic algorithm to better understand structure property relationships for metal nanoparticles.
- Organized and presented in several machine learning and software development meetings within the CANELa research group. Notable presentations include: version control using git/GitHub, an introduction to PyTorch and logistic regression, and developing custom Python packages.
- Mentored members of the group (grad and undergrad) about ML fundamentals, building models with PyTorch, and evaluating ML results.

**The Kitchin Group**Carnegie Mellon University

GRADUATE STUDENT RESEARCHER

Dec. 2019 - Dec. 2020

- Recreated image analysis tools in Python (originally in Mathematica) to be interactive, fast, and intuitive.
- Trained and deployed a convolutional neural network classifier to extract valuable information from experimental image data.
- Developed a Python package, nb\_search, to efficiently sort through, locate and open Jupyter Notebook files.
- Regressed parameters and used them to cluster different bimetallic catalysts.

#### Control, Optimization and Design for Energy and Sustainability (CODES)

West Virginia University

Undergraduate Researcher

Apr. 2017 - Aug. 2019

• Modeled, optimized, and economically evaluated a chemical process in MATLAB — Funded by the National Science Foundation.

SEPTEMBER 30, 2022 DENNIS J. LOEVLIE · CURRICULUM VITAE

# **Work Experience**

 AithELITE
 Pittsburgh, PA

LEAD DATA SCIENTIST/SOFTWARE ENGINEER

May 2021 - PRESENT

- Recruited and interviewed prospective data/software engineers.
- Provide expertise in technical decisions made by the company.
- · Communicate with the team and develop code to keep the EliteAI (AithElite's main application) working smoothly.

**AithELITE** Pittsburgh, PA

DATA SCIENTIST/SOFTWARE ENGINEER

Dec. 2020 - May. 2021

- · Developed web scraping scripts using Beautifulsoup and Selenium to automate data retrieval and updating.
- Developed and automated the feature engineering with Numpy and Pandas.
- · Applied machine learning algorithms using Numpy and SkLearn to generate intelligent predictions and insights from the data.
- Built and maintained relational (MySQL) and graph (Neo4J) databases, hosted on AWS.
- Built the frontend and backend of the AithELITE EliteAI website with Django, hosted on AWS.

# **Projects**

## Question Answering Model [ $\mathscr{E}$ ]

CMU Course

NATURAL LANGUAGE PROCESSING

· Developed models using SpaCy that can generate questions from a provided text and also find answers to questions about a given text.

### Disparity Map Generation [ $\mathscr{E}$ ]

CMU Course

DEEP LEARNING

- Modified the PSMnet architecture for disparity map generation to be used for 3D object detection.
- Implemented asymmetric convolutions that led to a 25% reduction in the model parameters with negligible change in the 3-pixel accuracy.

### **Speech Recognition** [ $\mathscr{O}$ ] *CMU Course*

DEEP LEARNING

· Implemented a feed forward neural network for speech recognition on audio recordings (utterances) of variable length.

### Speech to Text Transcription [ $\mathscr{S}$ ]

CMU Course

DEEP LEARNING

• Implemented a combination of recurrent neural networks (RNNs) (more specifically BLSTMs) and dense networks to design a system for speech to text transcription.

### American Sign Language (ASL) Active Learning [ $\mathscr{O}$ ]

Personal Project

DEEP LEARNING

• Developed a GUI that uses machine learning techniques such as a vanilla convolutional neural network (CNN) classifier and YOLOv3 object detection to tell a user if they have correctly signed a letter in American sign language.

# Honors & Awards & Activities

### University of Pittsburgh

2022 **GSA President**, Elected President of the Chemical Engineering Graduate Student Association *Pittsburgh, PA* 

#### CARNEGIE MELLON UNIVERSITY

2020	3rd Place, Chemical Engineering Masters Student Association (Chemba) Research Forum, Poster	Pittsburgh, PA
	Competition	
2020	<b>1st Place</b> , The Pitt Challenge, "Largest Impact on Healthcare Workers" Category	Pittsburgh, PA

# WEST VIRGINIA UNIVERSITY

2019	<b>1st Place</b> , AVEVA's National Simulation Competition (Advanced Category)	Morgantown, WV
2019	Vice President, American Institute of Chemical Engineers (WVU Chapter)	Morgantown, WV
2018	<b>2nd Place</b> , Computing and Process Control Division at the National 2018 AIChE Poster Presentations	Morgantown, WV
2018	Member, Omega Chi Epsilon Chemical Engineering Honor Society	Morgantown, WV

# **Relevant Courses**

2021	Natural Language Processing, Carnegie Mellon University (cross-registration), Graduate	Pittsburgh, PA
2020	Introduction to Deep Learning, Carnegie Mellon University, Graduate	Pittsburgh, PA
2020	Introduction to Machine Learning, Carnegie Mellon University, Graduate	Pittsburgh, PA
2019	Linear Optimization (supply chain focused), Carnegie Mellon University, Graduate	Pittsburgh, PA
2017	Numerical Methods and Optimization, West Virginia University, Undergraduate	Morgantown, WV
